

CUSTOM-DESIGNED

# Emergency Bollard

**WE PROTECT LIVES & ASSETS THROUGH TECHNOLOGY**

# Provide immediate assistance in case of emergencies in large areas.

Large grounds and campuses with high footfall are prone to security vulnerabilities due to multiple access points for vehicles and pedestrians, posing a challenge in ensuring the safety of those on the property.

The FS Group provides a custom-designed **Emergency Bollard solution** that enables immediate notification of incidents to Protection Services and draws attention to the scene, improving response time and increasing the chances of getting help.

By pressing the intercom, students, personnel or pedestrians can alert the Control Room and activate a visual indicator through the LED turning red, allowing real-time communication with the victim through the two-way speaker and quick situation assessment.

The solution provides immediate assistance in criminal or medical emergencies, enabling first responders to respond in real-time and potentially making a critical difference in ensuring safety.

The **IP horn speaker** broadcasts crystal clear messages and has two-way speaker capabilities. The connection of the IP horn speaker with PoE+ enables the integrated 15W amplifier to broadcast excellent sound quality at a very high sound pressure level over long distances.

**LED visual indicators** serve the purpose of providing a visible indication of a confirmed event.

A high-performance **Video Intercom**, featuring echo-cancelling and noise reduction technologies, for clear two-way communication. Built-in audio capabilities enables operators to activate audio talk down, helping to deter incidents.

The **Avigilon H5A Fisheye Camera** is a cost-effective and easy-to-install solution that provides 360° panoramic views of large areas from a single vantage point, bringing superior situational awareness without any blind spots. **ADAPTIVE IR\*** Provides optimal brightness in scenes with low-light for high-resolution image detail

The **Avigilon H5A Dual Head Camera** is a cost-effective and low profile dual-sensor camera that provides increased area coverage and IR illumination, helping to bring enhanced security for blind spots and hard to secure places.

Provides increased area coverage, while minimizing blind spots for enhanced security with a single camera installation,

**ADAPTIVE IR\*** Provides optimal brightness in scenes with low-light for high-resolution image detail

**Custom Stickers and Decals** can be added to the Emergency Bollard, as well as the colour of the Bollard itself customised.
